Sociology	**Sociology GCSE - Grade 6** If the applicant did not study Sociology GCSE, we require English Language GCSE – Grade 6

Oversubscription Criteria
In the event of oversubscription, the following additional criteria will apply for any affected subjects: Where the number of eligible students wishing to study a subject exceeds the number of available places, priority will be determined by applicants' GCSE grade in the relevant subject, followed where necessary by the grade in the associated subject specified in Appendix A. Any remaining tie will be determined in accordance with the published admissions tie-break arrangements. ~~**At least a grade 7 in the oversubscribed A level subject**~~ ~~or an increased requirement of either 7 or 8 or 9 in the associated subjects required for that course~~

- Conditional offers do not always guarantee the subjects that have been selected by a candidate will be the subjects undertaken at A level. Subjects to be studied are determined by exam results and availability of spaces.
- If a subject has not been studied at GCSE level then it may still be possible for that subject to be taken at A-level. See the individual course requirements for more information.
- The school and its governors reserve the right to reduce curriculum time allocated to a specific course due to low uptake of students and also to withdraw a course due to an extremely low uptake from students.
